BACKEND SKILLS

Python Web

Python, Django, Django REST
Framework, FastAPI, Flask, Jinja2

APIs & Auth

REST APIs, JWT/Auth, Swagger/
OpenAPI, request validation, CRUD
workflows, CSRF-aware requests

Data Layer

PostgreSQL, SQLite, SQLAlchemy,
Alembic, Pydantic, Django ORM

TOOLS & PRODUCT

AI & Payments

Gemini API, Ollama, Stripe, Google
Pay support, context-aware
assistant features

Frontend

JavaScript, TypeScript, React, Vite,
Tailwind CSS, Bootstrap, Framer
Motion, EmailJS

Dev Tools

Docker, Git/GitHub, GitHub Actions,
Pytest, Postman, Render, Vercel,
Requests, Playwright, Selenium

EDUCATION

Vistula University

Computer Engineering coursework,
Warsaw, Poland
Completed two academic years
toward a B.Eng.; currently not
enrolled.

CERTIFICATES

CS50 Web Programming with Python and JavaScript

Harvard University

Python Mega Course: Build 20 Real-World Apps and AI Agents

Udemy

Backend Engineering Internship Certificate

Springer Capital

Foundational C# with Microsoft

freeCodeCamp / Microsoft

Postman API Fundamentals

Postman

LANGUAGES & INTERESTS

English, Ukrainian, Russian, Polish
Strength training, basketball, chess

Python-focused developer who learns by building real software, debugging hard problems, and turning practice into shipped projects. I have worked with a real client, completed a backend engineering internship, and built full-stack applications with payments, AI assistant features, community workflows, and production deployment. I am looking for a team where I can contribute, learn quickly, and grow into a stronger backend/full-stack engineer.

EXPERIENCE

Freelance Web Developer

[Live Site](#)

Andriy Rochnyak Photography · Remote · Jun 2025 — Present

- Designed, developed, deployed, and continue to maintain a production website for a professional photographer.
- Built responsive React/TypeScript UI with custom sliders, image-focused layouts, awards/publications pages, polished animations, and custom domain deployment.
- Handle ongoing updates, SEO improvements, mobile optimization, and production stability while collaborating directly with the client.

Backend Engineering Intern

Sep 2025 — Dec 2025

Springer Capital · Remote

- Built and maintained backend services using Python, Flask/Django, PostgreSQL, and REST API patterns.
- Implemented authentication, request validation, Swagger/OpenAPI-style documentation, and database-backed workflows.
- Wrote Pytest-based tests, worked with Docker and GitHub workflows, and contributed technical documentation.

Python Backend & Full-Stack Projects

[GitHub](#)

Self-directed development · 2024 — Present

- Built and improved Django/FastAPI applications, API-driven tools, AI features, web scrapers, and deployed projects while learning through documentation and implementation.

SELECTED PROJECTS

CapstoneGym — RoshaClub

[Live Demo](#) | [GitHub](#)

Django gym membership management system with payments, community feed, and AI assistant

- Built a realistic gym workflow: user registration/login, program browsing, trainer profiles, membership purchases, profile status, and admin-managed content.
- Integrated Stripe card payments with Google Pay support, success/failure feedback, membership start/end dates, and active/expired/pending status logic.
- Created an AI Fitness Assistant with Ollama local mode and Gemini cloud mode, DB-backed chat sessions/messages, provider switching via environment variables, rate limiting, caching, and timeouts.
- Implemented an AJAX community feed with create/edit/delete posts, like/unlike actions, CSRF-aware requests, and ownership validation.
